

# AvTraffic

Improving Traffic Awareness in Busy Airspace

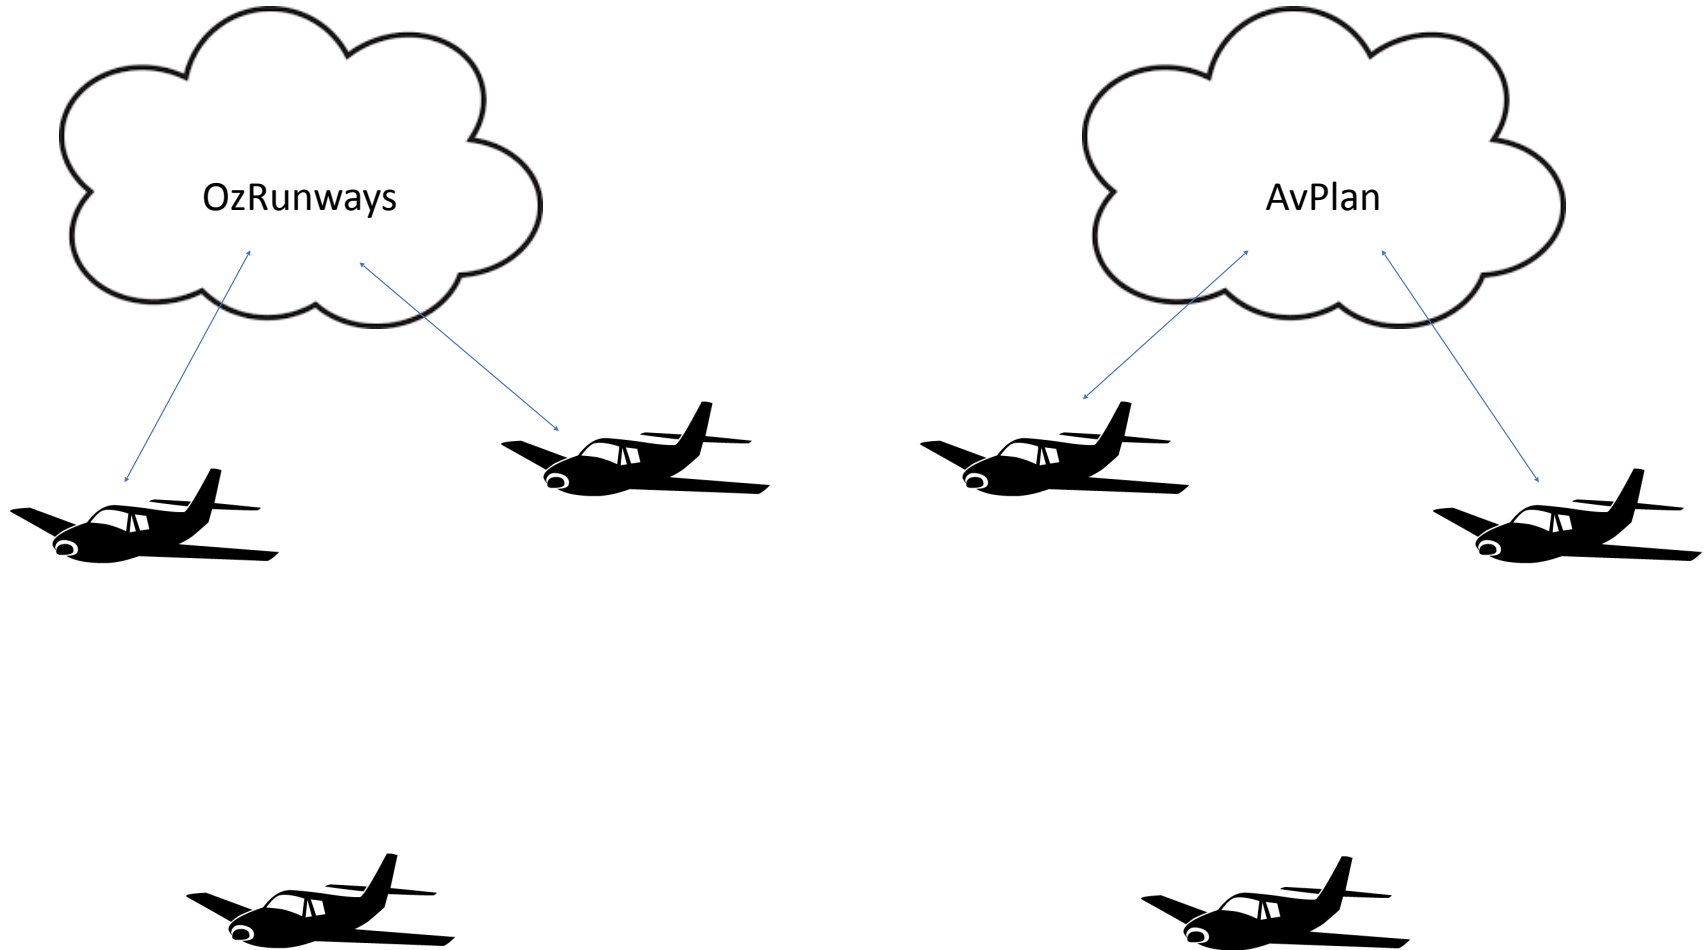

# Traffic Awareness

- Look out the window
- Use the radio (ENR 1.1 section 6)
- EFB traffic sharing
- TCAS

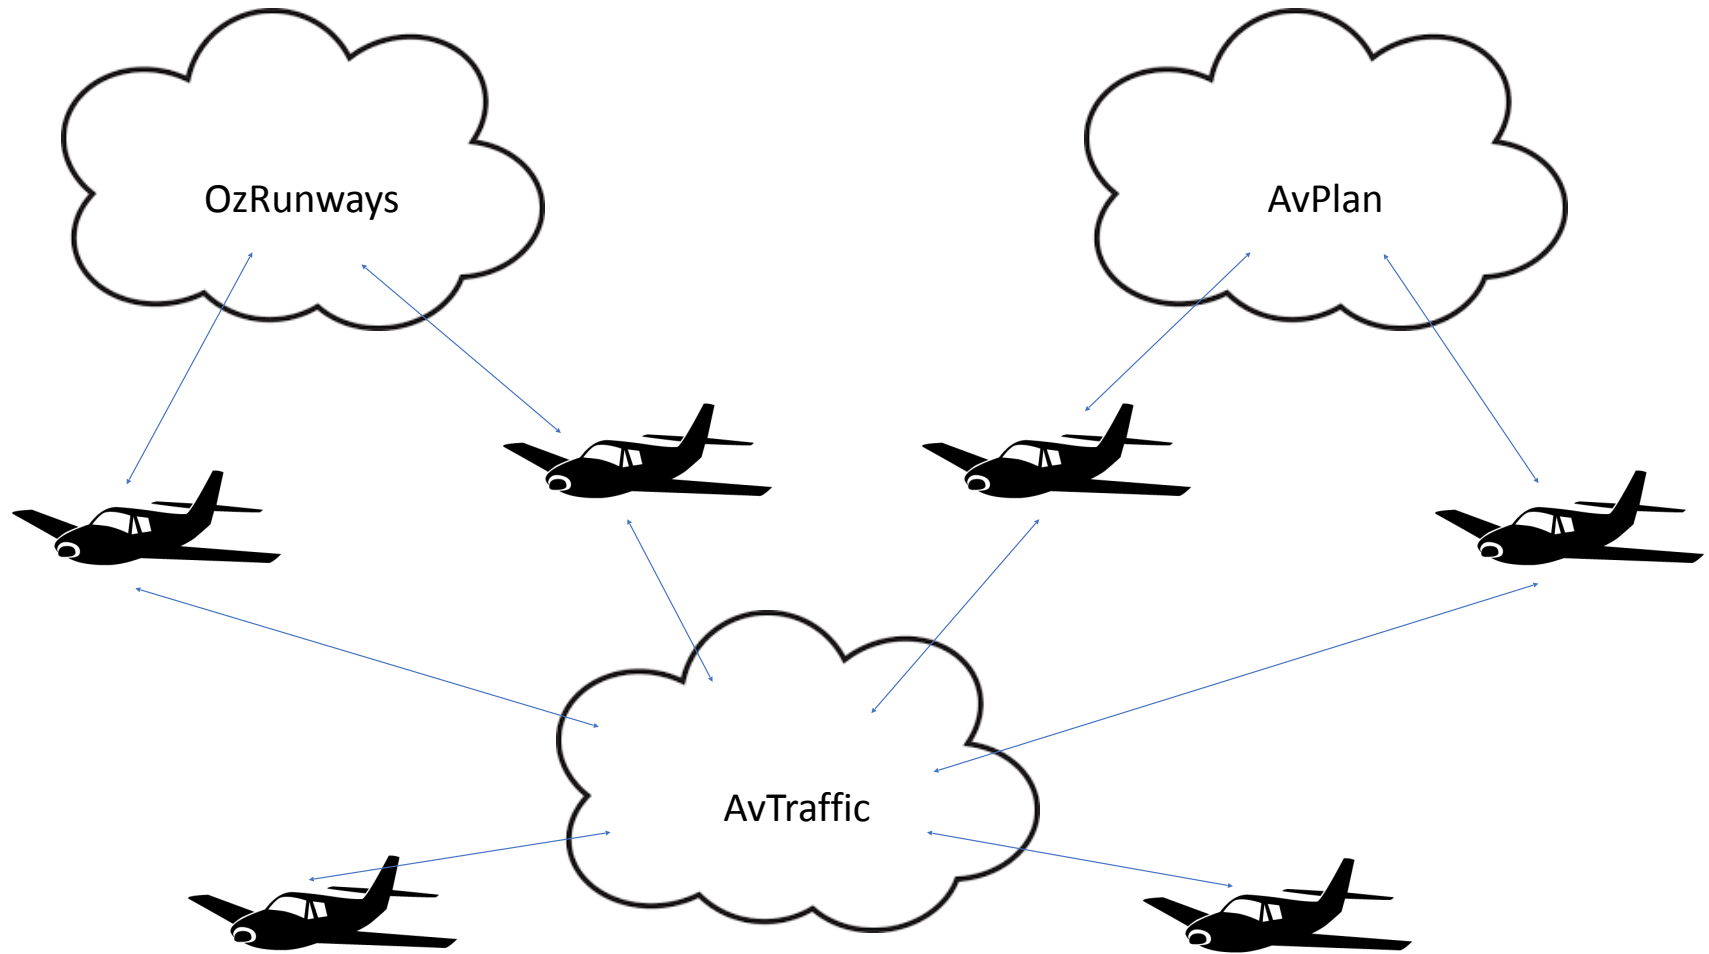

# The Problem With EFB Traffic

- No EFB
- Don't carry EFB or don't switch EFB on
- EFB tablet has no cellular access
- OzRunways or AvPlan traffic not enabled
- OzRunways and AvPlan don't share traffic
- For each aircraft visible on your EFB, at least two or three probably not showing for the reasons above

Currently ...

Hopefully ...

# AvTraffic Options

- Run on phone and forget
- Run on panel-mounted phone and monitor
- Run on tablet with EFB (EFB integration)

# EFB Integration

- Run AvTraffic on your tablet
- Close it (now running in background)
- Open your EFB
- Your EFB now receives additional traffic from AvTraffic
- It displays all traffic on the same screen in the same style
